Jan-Mar 2012	0	0	<5	0.04	0	0	<5	0.01

*The MRSA bacteraemia rate is calculated as a rate per 1,000 patient days.

The “total patient days” represents the sum of the number of days during which services were provided to all inpatients during the given time period.

The rate is calculated as follows:

(Number of new hospital acquired cases of MRSA bacteraemia in our facility during the reported quarter / Total number of patient days for the quarter) x 1000.

To view MRSA rates for all Ontario Hospitals, please visit the [Ministry of Health](#) website.
